

Das universell einsetzbare skai® Evida präsentiert eine haptisch sehr angenehme Oberfläche mit einer charakteristischen Ledernarbung. Wie beim natürlichen Vorbild variiert die Tiefe der Narbtäler, was den natürlichen Eindruck noch verstärkt.

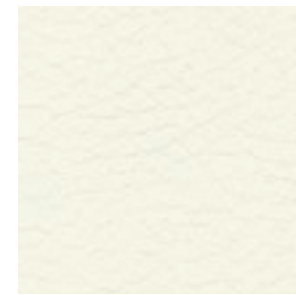

Versatile skai® Evida has a surface that feels very pleasant with a characteristic leather grain. As is the case with its natural prototype, the depth of the grain valleys varies, underscoring the natural impression.

El skai® Evida permite un uso universal y presenta una superficie con un tacto muy agradable y un característico grano de cuero. Al igual que en su modelo natural, la profundidad de los valles del grano varía, lo que refuerza aún más la sensación natural.
