

### Product highlights

- 11cm increased thickness for maximal comfort of heavy patients
- Each of upholstery segments (backrest, seat, legrest) includes cushion foams with different elasticity properties (density and flexibility) tested & optimised for heavy duty
- Easy to clean thanks to less seams, gaps and homogeneous surface shaping
- Dual-colour upholstery design with wide range of colour combinations gives great freedom in choosing and fit the right colour for treatment room atmosphere
- More than 40 different colours and their combinations are available
- Can be easily removed for cleaning and disinfection thanks to its fixing straps
